

Learning Healthcare in Action: Interoperability in Healthcare

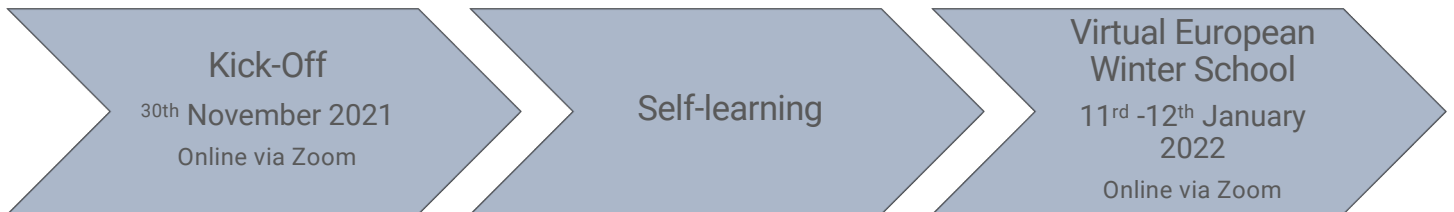

International Online Course

CINTESIS / Faculty of Medicine University of Porto

The module **Interoperability in Healthcare** will provide you with a perspective of the wide spectrum of problems in the field of Health Information Systems interoperability, its implications in Healthcare and paths to promote coherent and **safe information exchange**. It reinforces the important **role of standards** in fostering interoperability and provides a **hands-on approach** creating the opportunity for you to experience scenarios where information exchange occurs, putting you in the driver's seat while reaching for a solution.

After a Kick-Off Meeting, a self-learning phase, in which you make yourself acquainted with the topic in a self-paced manner, follows. In a final workshop, you will **collaborate with peers from Germany, Finland and Portugal**.
